DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 9-14; claim 13, lines 9-14; claim 14, lines 9-12; claim 15, lines 9-12; claim 16, lines 9-14; and claim 17, lines 9-14; the recitations of "detecting an edge existed in a first type of block" and "compresses/compressing the color image data of pixels contained in the first type of block for which no edge is detected" appear to contradict one another.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2625

4. Claims 16-17, insofar as they are understood, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 16 & 17, insofar as they are understood, are directed to a "program", which is not within any of the statutory categories of "process, machine, manufacture, or composition of matter".

Allowable Subject Matter

5. Claims 1-17, insofar as they are understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Re claims 1 & 13-17 (and dependent claims 2-12), the art of record does not teach or suggest the recited arrangement of color conversion, edge detection, block compression based on the edge detection result for a block, and dot on/off state judgment.
